

dB BLOCKER®
nX™ BLUETOOTH

"THE SMARTEST HEARING PROTECTION IN THE WORLD,"

dB Blocker® nX™ BlueTooth Headset and Earpiece

This custom earpiece and wireless headset allows you to hear your caller clearly without surrounding sounds invading your conversation.

SUPERIOR NOISE CANCELLATION ALLOWS YOU TO HEAR AND BE HEARD.

dB Blocker nX™ BlueTooth wireless headset uses the world's most powerful Digital Signal Processor (DSP) to boost acoustic performance, reduce background noise, and isolate your voice for superior hands-free mobile communications. nX has two microphones which identify which sounds to pass based on the timing of when the sounds reach each microphone. The DSP also suppresses sounds of constant volume and frequency (similar to noise) and passes sounds that vary (like speech). *

RECOMMENDED USES

- Industrial
- Construction job sites
- Equipment operators
- Driving
- Where hands free communication cell phone is required

FEATURES

- Noise cancellation
- Hands free
- 7 hours talk time
