

Cell Phone Headsets

Plantronics Headset (#9122)

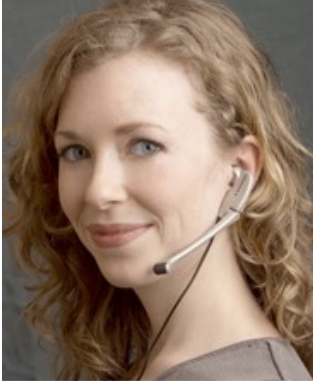

The Plantronics M-140 headset is the best and most affordable noise canceling headset we've found.

RECOMMENDED USES:

- Hands free cell phone use while driving

FEATURES:

- Noise reduction of 85 - 95dB
- Extremely light weight
- Very effective noise canceling technology
- 2.5 mm plug connector for some Sony, Ericsson, Siemens, Handspring TREO, Palm, RIM Blackberry, and Nokia phones. Note some Nokia phones use a four segment 2.5 mm pin. Please check your model.

PLEASE NOTE:

- Requires a Custom Cell Phone Adaptor (CPA) ear piece (#7800 or #7900)

Ca-Boom Headset (#9121)

The Clear Call™ Ca-Boom Headset is the lightest, best noise canceling cell phone headset we have ever seen. The Clear Call™ Ca-Boom Headset has a unique noise canceling technology that only amplifies sound from the area in front of the boom closest to your mouth. Ca-Boom is truly the least intrusive best noise canceling headset on the market. Etymotic Research has combined their noise-isolating earphone and a noise-rejecting directional microphone to make our Ca-Boom provide clear two-way conversations in even very high levels of noise. When connected with your own custom made hearing protector, Ca-Boom enhances your cell phone experience.

RECOMMENDED USES:

- Hands free cell phone use while driving
- Industrial noise applications with cell or Iden phones

FEATURES:

- Noise reduction of 37dB averaged over the octave frequencies from 125 to 8000Hz
- Volume limiting filter between headset and the ear
- Earpiece custom molded to each individual (#7000)

BENEFITS:

- A high degree of noise protection while permitting radio communication
- Reduced background noise and positive fit for your headset, makes hands free cell phone experiences much better
- Comes with 2.5 R/A (right angle) connector

* Please note: requires a custom earpiece model #7000
