

## Protection Plus™

*Protection Plus™ is the answer to all your concerns from loss to weight change.*

### *What's the PLUS of Protection Plus™?*

The PLUS behind Protection Plus™ is insurance that protects your company's hearing protection program costs. Purchasing this insurance program protects you – the employer from:

- The cost of replacing lost dB Blocker® hearing protection
- The cost of replacing dB Blocker® hearing protectors that do not fit properly as a result of weight change
- The replacement cost of damaged or stolen dB Blockers®
- An increase in the cost of dB Blocker® hearing protection between initial fit and 5 year refit

Protection Plus™ is a five year per specific worker insurance policy renewable annually. Each year, a schedule of the workers originally fit, still employed by the company, is the basis for calculating the premium for the ensuing year. At the end of five years, everyone insured is eligible for a refit for just an administrative fee. The plan is non-transferable and applies to those employees initially fitted when the plan was initiated<sup>1</sup>. The plan applies only to the dB Blocker® and does not cover any additional equipment, like electronics, added to the protectors or any specialty products purchased with the dB Blockers®.

Regardless of when your employee loses their dB Blockers® or how many of your employees lose their dB Blockers®, we will replace them for only a small deductible.

This versatile program is available for companies with 50 or more employees wearing dB Blockers®.

*Speak to your Custom Protect Ear Representative or call*

<sup>1</sup> You may add subsequent hires and replacement workers in the first year of the plan only.
