

Custom Protect Ear

ISO 9001-2000

FOOD FOR THOUGHT

In food processing, the highest quality and hygiene standards must be maintained. With people's lives and the earth's future at stake, **every step must be taken to ensure the welfare of the public and the environment.** This puts a lot of pressure on employees to perform at their best, which is why many of your competitors are investing in their workers' best interests.

Specializing in personalized hearing protection, Custom Protect Ear (CPE) has helped many food processing operations, including Weston Bakeries, Maidstone Bakeries, Barry Callebaut Canada Inc., PepsiCo and Cott Beverage, overcome their performance limitations and safety concerns for many years.

From the very start, we assess the noise levels and working conditions each person faces. Then we determine the best protectors for the individual and make appropriate recommendations for **optimal productivity, protection, and comfort.**

Matching the level of protection to the level of noise allows your workers to hear warning sounds and back-up alarms, and even communicate interpersonally and by radio without removing their protectors. While still remaining protected. We also ensure that protection continues to function under

freezer temperatures down to -20°C (-4°F) by choosing better materials for stronger cords that don't get brittle and break in the cold.

To help your workers **adhere to stringent quality and hygiene standards**, our hearing protectors are made of SkinSoft™ medical grade silicone and are hypoallergenic, washable, and non-porous so they don't breed contaminants. They're available as **metal detectable**, making them easy to retrieve if they get dropped in a batch being made. If they get lost, they're easily replaceable as the custom moulding taken during fitting is retained for five years. And being custom fit, they're not disposable, so they're **cheaper to use.**

With your workers' hearing properly protected by dB Blockers™, you can rise above all these challenges, enabling your workers to perform even more effectively.

Over the years, CPE has anticipated our needs and far exceeded our expectations. They're even working on advances to our protectors. They really take the time to understand the challenges we face in our daily operations.
